

5 **STORAGE AND RETRIEVAL OF ENCRYPTED CONTENT ON A
 STORAGE MEDIA**

ABSTRACT OF THE DISCLOSURE

In a communication system having a terminal for receiving encrypted content, the terminal being coupled to a storage media via an IEEE 1394 serial bus, a method for
10 storing the encrypted content on the storage media. The method includes (1) receiving the encrypted content via the IEEE 1394 bus; (2) encrypting a first key for decrypting the encrypted content to form a second key; (3) combining the encrypted content with the second key to form a combined encrypted content stream; and (4) storing the combined encrypted content stream on the storage media.
